SCRAPIE MONITORED FLOCKS

The Suffolk is the only breed to provide significant Scrapie resistance within the national flock. Already a massive 92% of Suffolks have totally or predominantly resistant genotypes. The Suffolk is in a stronger position than many breeds because its genetic resistance to Scrapie is relatively simple to improve through breeding. Many individual members have invested heavily in ensuring their flocks are 100% Scrapie resistant. Susceptibility can be determined, by using a simple blood test that reveals the sheep's genotypes. Research shows there are three places in the genotype where variations occur, known as codons. Codon 136, 154 and 171. The Suffolk breed only varies on codon 171. Therefore they are either Scrapie resistant "RR"; have some resistance "RQ" or are susceptible "QQ". In contrast many other breeds have variations on all three codons.

All sheep at this sale have been Scrapie Genotyped - only those testing "RR" or "RQ" will be eligible for sale. Most sheep have their test results printed in the catalogue - those still awaiting results at the time of print will have them on the day of sale - all prospective purchasers are strongly advised to check the Genotype of any sheep before making a bid in order to avoid disappointment.

Sale will run in Catalogue order – one ring only

Sheep Ireland €uro-Stars

Background

The Sheep €uro-Star breeding index for sheep that were bred in flocks that participated in the LambPlus Sheep Breeding Scheme has been developed by Sheep Ireland and reflects how much Profit (€) a sheep farmer can expect to realize from making a breeding decision. They are designed to help farmers increase returns from sheep breeding and are based on available data on all animals in the Sheep Ireland Breeding Database.

€uro-Stars -What do they mean?

Overall Sheep Value	Measure of the Overall Sheep Value of an animal - combines Sub-Indices together.
Production Index	Measure of genetic merit of a Sheep for Terminal traits.
Maternal Index	Measure of genetic merit of a Sheep for Maternal traits.
Lambing Index	Measure of genetic merit of a Sheep for Lambing traits.

€uro-Stars - Where does the information come from?

Index	Information Source
Production	1. Individual On-Farm Weights (Birth, 40 days old and Weaning). 2. Days to Slaughter. 3. Ultrasound Muscle & Fat Scanning.
Maternal	1. Lambing Ease. 2. Weaning Weight. 3. Ultrasound Muscle & Fat Scanning. 4. Lambing Survival.
Lambing	1. Lambing Ease. 2. Lambing Survival.
Other Key Traits	Lamb Survival: Is calculated directly from data recorded on farms. Days to Slaughter: Predicated from 40 day weights, weaning weights and scanning weights.
Accuracy %	This is an indication of how much confidence can be placed in the evaluations.
N/A	€uro-Star Indexes are sometimes not available due to the accuracy % for that index being too low.
% Rank	Shows how far into the Star Rating the sheep is placed.
Dam Rec	Previous litter size. (Example: '32' = last litter - 2 lambs, second last litter - 3)
€uro-Stars ★★★★★	5 Stars = Top 20% of the Breed. 4 Stars = Between Top 40% and Top 20% of the Breed. 3 Stars = Breed Average. 2 Stars = Between Bottom 40% & Bottom 20% of the Breed. 1 Star = Bottom 20% of the Breed.

LambPlus^(R)

LambPlus^(R) is the Sheep Ireland Breeding Information Service for both Pedigree and Commercial sheep farmers. LambPlus^(R) will record relevant on farm data submitted by the farmers and flock owners will then get genetic evaluations and flock reports that will allow them to compare their flock's performance with other LambPlus^(R) users.

To find out more about 'LambPlus', call Sheep Ireland today on 1850-600-900 or (www.sheep.ie).

RAM FERTILITY GUARANTEE

- 17.1 All rams and ram lambs sold at a Society sale are warranted by the seller to be capable of natural and effective service by **90** days from date of sale (“the Male Guarantee Period”) provided always that:
- 17.1.1 any animal which is not so capable and where the incapacity is caused or contributed to by injury or illness howsoever caused, suffered or contracted after the sale is not covered by the warranty; and
- 17.1.2 any animal which has not been conclusively determined as incapable of natural and effective service in accordance with the procedure set out hereinafter and which dies of natural causes during the Male Guarantee Period is not covered by the warranty.
- 17.2 An animal shall be deemed incapable of natural and effective service if:
- 17.2.1 It fails to make at least one ewe pregnant during the Male Guarantee Period under natural breeding conditions; and
- 17.2.2 It is certified as being so incapable by a veterinary surgeon in accordance with clauses 17.4 and 17.5 below.
- “Natural breeding conditions” means when a ram is run with ewes in normal breeding condition, cycling without artificial interference. Ewes which have been sponged and/or treated with hormones to induce or synchronise ovulation are deemed not to be in normal breeding condition.
- 17.3 The buyer shall throughout the Male Guarantee Period give the animal full and sufficient opportunity to prove that he is capable of natural and effective service and maintain him in a fit condition.
- 17.4 If the buyer highlights that the ram or ram lamb has failed to prove capable of natural and effective service by **76** days from sale date of the year of sale, the buyer shall then:
- 17.4.1 Notify the seller in writing that the animal is to be tested; and
- 17.4.2 Have the animal subjected to a semen test by the artificial vagina method by a veterinary surgeon attached to a breeding company authorised by the society; and
- 17.4.3 Obtain from the veterinary surgeon a duly completed Soundness for Breeding report; and
- 17.4.4 (If the veterinary surgeon certifies that the animal is incapable of natural and effective service) lodge a copy of the Report with the seller.
- 17.5 The seller shall be entitled to have a second test carried out by the same or a different veterinary surgeon attached to a breeding company authorised by the Society who shall issue a Soundness for Breeding report by 14 days after notification by the purchaser and such Report shall conclusively determine whether or not the animal is capable of natural and effective service. The seller shall deliver to the buyer a copy of this second Report. The buyer shall at the expense of the seller do all acts, deeds and things necessary to enable the second test to be carried out. If the animal shall be deemed fertile the buyer shall on demand repay the seller the veterinary surgeon fees of the second test and Report.
- 17.6 If the ram is deemed incapable of natural and effective service during the Male Guarantee Period, the buyer may by 31st October of the year of the Sale return the animal to the seller and thereupon the seller shall repay to the buyer the whole of the purchase price and the cost of transport of the animal from the buyer’s premises to the seller’s premises and the veterinary surgeon testing fees incurred by the buyer.
- 17.7 The seller shall not be liable for any indirect or consequential loss howsoever sustained by a buyer.
- 17.8 As to clauses 17.4 and 17.5 and 17.6 time is of the essence.
- 17.9 The seller and the buyer may vary the provisions of clauses 17.4, 17.5, 17.6, 17.7 and/or 17.8 if but only if and insofar as the variation is set out in writing and signed by each of the parties.
- 17.10 The terms of any statutory enactment or custom or trade which are inconsistent with the provisions of this Bye-law 17 are hereby excluded.
- 17.11 Failure to comply with any of Bye Law 17 will allow the Society, at its discretion, to cancel Society membership.
- 17.12 Society Bye Laws do not exempt a breeder from the Sale and Supply of Goods Act.
