Fenaghy Road, Galgorm, Ballymena, Co. Antrim, BT42 1FL**

DNA sample submission form for new male registrations

As of 20th July 2018 it is a requirement that all new male registrations are supported by a DNA profile. Please use the enclosed nasal sampling kits to take the required DNA samples and return them to the Society without delay to enable our approved laboratory to produce profiles.

Provision of kits will be funded by the society for each male registration. The cost of the test is £25+VAT, however, the Society is subsidising 60% of this. A reduced fee of £10+VAT will be charged to the account of the member registering the ram.

PLEASE NOTE – IT IS THE RESPONSIBILITY OF THE BREEDER REGISTERING THE RAM TO PROVIDE THE DNA SAMPLE, ANY FEES WILL BE CHARGED TO THEIR ACCOUNT.

The male will be entered on the Grassroots Database but a registration Certificate will not be issued until the DNA sample has been received. The Society reserves the right to suspend any ram should a dispute arise from the outcome of any DNA test carried out.

A Ram Pedigree Pro Forma must be completed and submitted along with the DNA Sample and this completed form for all rams not purchased at a Society Sale.

I confirm that the nasal samples listed overleaf came from the animal/s who's EAR TAG I have checked. By completing this form I authorise the disclosure and use of DNA profile to the Suffolk Sheep Society, who will use such information for the advancement of the Suffolk breed. The Society confirms that the intellectual property rights in the applicant's raw data belong to the applicant. The applicant agrees that all intellectual property right in genomic information and in all other data derived from the applicants data belong to the society. The Society reserves the right in its sole discretion to publish such derived data.
